

FCP

FCP

Design of the rail infrastructure of tomorrow.

Thanks to modern technologies our work is resource-efficient and environmentally friendly and thus we make railways highly available and accessible for people.

RAILWAY ENGINEERING

We design railway sections holistically – from basic evaluation up to operation. We apply BIM methodologies even in early project phases.

5

6

- 1 **DB Neues Werk Cottbus • DE**
Design of traffic and ancillary structures, underground cable, line construction and noise barriers
- 2 **Stuttgart S21 Los C • DE**
Design and new development of ballast-less tracks incl. track covering, floating slab tracks
- 3 **VDE 8.2, 8.1.2 & 8.1.3 • DE**
Design of ballast-less track and cover system, noise barriers, underground cable engineering, measurement and instrumentation
- 4 **NCRTC Delhi-Meerut • IND**
Conceptual design, detailed structural design
- 5 **Tauerntunnel • AT**
Design of rehabilitation of existing ballast-less tracks and partial renewal
- 6 **NBS Wendlingen-Ulm & S21 Los D • DE**
Design of ballast-less tracks, floating slab tracks and underground cable engineering
